

Rhino revolver

Rhino is an unusual arm. Thanks to this coil and muzzle chamber 6 level design shifts in fast and highly-accurate repeat shots. Cylinder makes for a flatter profile when carried with a hand-made Italian calf skin molded to 2-inch wide belts and is marked with (course .38 Special)

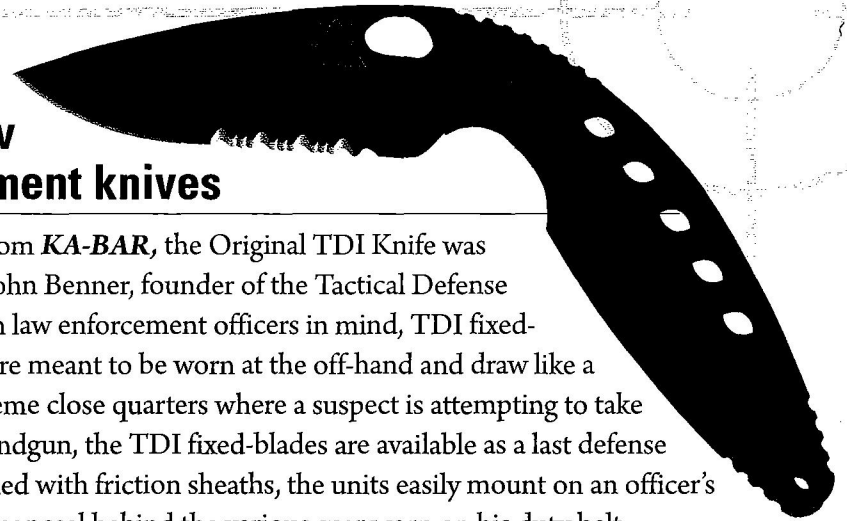

- Stocks: Composite rubber or wood; one piece, retained by a single screw at the butt
- Barrel lengths: 2 inches, 4 inches, 5 inches and 6 inches

TDI style law enforcement knives

Available from **KA-BAR**, the Original TDI Knife was designed by John Benner, founder of the Tactical Defense Institute. With law enforcement officers in mind, TDI fixed-blade knives are meant to be worn at the off-hand and draw like a pistol. In extreme close quarters where a suspect is attempting to take an officer's handgun, the TDI fixed-blades are available as a last defense option. Coupled with friction sheaths, the units easily mount on an officer's pant belt and conceal behind the various gear worn on his duty belt.

Specifications of the new models:

No. 2482 TDI Folder

- Open length: 7 1/2 inches
- Blade: 3 5/8 inches
- Color: black
- Handle: G10

'Sees' through smoke, fog and more

The FLIR ThermoSight T50 from **US Night Vision Corp.** is a 320 by 240 advanced thermal weapon sight built for target acquisition, covert operations and surveillance. Designed to interface with standard day optics, the ThermoSight T50 maintains boresight and reticles remain calibrated. The unit can be used as a thermal weapon sight mounted on a Picatinny rail or as a handheld imager. The longwave thermal imaging sensor provides the user with a crisp image in extreme darkness, smoke, fog and many other atmospheric conditions.
