2022 NEW PRODUCTS

1269 FIGHTER, STRAIGHT EDGE
MSRP: \$122.68

A KA-BAR classic now offered with a straight edge. The 1269 Fighter is a companion to our serrated 1271 Fighter. The 1269 Fighter comes with a hard plastic sheath. See page 12 for full specs.

1333 HATCHET HAWK

COMING SOON!

The Hatchet Hawk was born from an overwhelming demand for a large hatchet that won't break the bank. Comes with a Cordura® sheath.

3067 MARK 98-R FOLDER

MSRP: \$30.12

Taking it back to our roots, the Mark 98-R features a razor blade shape. See page 49 for full specs.

7511 JAROSZ CAMP TUROK

MSRP: \$163.12

A beefed up companion to the popular Jarosz Turok. Designed by Jesse Jarosz of Jarosz Knives and includes a hard plastic sheath. See page 39 for full specs.

9929 SWEET MOVE SLINGSHOT

COMING SOON!

The Sweet Move Slingshot is all about range. It joins our wildly popular accessory line alongside the KA-BARLEY Bottle Opener, Spork, and Playing Cards.

6420/6421 STATE & UNION

OSF TITANIUM FOLDER

MSRP: \$450.00-\$500.00

The OSF Folder is made in our State & Union Shop in Olean, NY with high-end components & materials. See page 27 for full specs.

When you see the Shopping Cart icon, clicking on it will take you directly to KA-BAR.com for the option to purchase that specific product.

When you see the Video Review icon, go to our YouTube or Vimeo channels where you can see product videos along with designer interviews.

1217*

When you see the asterisk next to a item number this indicates that the product is also offered in a Clam Pack packaging option for retail display.

KA-BAR®

What does it mean to manufacture in America?

At KA-BAR, it means hard working folks undertaking the steps needed to make a knife each and every day in Olean, NY. Whether it is blanking sheets of steel in Department 1, grinding blades in Department 5, or building folding knives in our State & Union Shop.

When a KA-BAR is born, it is baptized in sweat and crafted by hardened hands. It comes to you with the fingerprint, DNA, and ghosts of generations of American manufacturing. If you own a KA-BAR you have a piece of all those who built our knife and have used our products for 124 years.

The KA-BAR Story is a documentary that follows the 120 year history of KA-BAR Knives from our humble beginning to present day. Running time: 46:12

The unique process of making a KA-BAR knife combines the talent of experienced craftspeople, expertise of knife enthusiasts, detailed finishing, rigorous inspection and testing.

AMERICAN MANUFACTURING

BLANKING/LASER CUT

Blanking is a shearing process in which the blade of a knife is punched out of a larger piece of metal. Using a 100 ton blanking press, KA-BAR can blank out nearly 9,000 knife blades in one full day of operation.

TANG STAMPING

After blanking out the blades, tang stamping is used to identify the knife. The manufacturer's name and an item number are stamped into the blade of the knife.

HEAT TREAT

In the first phase of our well-known heat treatment process, blades are run through a heat treating belt oven. This 70-foot conveyor oven is one of the largest in the country and takes a full hour to complete one cycle.

GRINDING

KA-BAR knives feature flat or hollow ground blades. Flat grinds are best for jobs with which there will be great lateral stress. Hollow grinds provide a fine, extremely sharp edge perfect for more delicate tasks.

LEATHER HANDLE COMPRESSION

Our eye for detail does not end with the blade. The KA-BAR oval-shape leather handle construction on the famous USMC knife is made by first compressing leather washers onto the tang, shaping and coloring them, and then fastening them on with a pinned-on butt cap.

CAP/PIN ASSEMBLY

The butt cap or pommel is attached to the handle of a knife with a steel pin. The pin is inserted into the butt cap and driven part way through the tang.

A brief history of KA-BAR Knives and the production of the iconic KA-BAR USMC Fighting/Utility knife. Running time: 2:27

1217* USMC Fighting/Utility

KA-BAR and E.W. Stone, Jr., E.W. Stone's son, have collaborated to release 350 of the iconic, theater-made World War II knives. Using the original casts, the legendary skull and cobra handle grips a blued KA-BAR USMC Fighting/Utility knife. Running time: 5:26

1217EWS
E.W. Stone Knife
Pg 23

The legendary story of the Eugene Stone Knife lives on with this limited offering by KA-BAR Knives and Bill Stone. Using his father's original casts to make the famous skull and cobra handle, Bill Stone touched each and every one of these knives, hand finishing them before sending the blades to be blued. The end result is stunning.

The handle is a gorgeous, shiny silver while the blades are a beautifully rich, deep shade of blue. Sold with JRE semi-custom leather sheath and Gerstner golden oak case with nickel corners, hinges and draw latch.

Each knife comes with a certificate of authenticity, a DVD of Bill Stone telling his father's story and how he came to work with KA-BAR on this limited edition project, and custom-designed packaging.

Designed by R. Lee Ermey, also known as "The Gunny". This was the last project The Gunny worked on before his passing in 2018. Created to be used in any and all terrains and situations.

The pile side of the blade is marked with R. Lee Ermey's official "GUNNY APPROVED" logo at his request.

A portion of sales of the Gunny Knife will be donated to TAPS, the Tragedy Assistance Program for Survivors. TAPS provides comfort, care and resources to all those grieving the death of a military loved one.

Product Specs:

The Arrowhead Patch features a retro-inspired logo including two crossed KA-BARs under the KA-BAR name including 1898 and USA. The 3" patch is made of PVC and has a velcro back.

Features:

- Manufactured in China.

1095 Cro-Van Steel
Easy to sharpen carbon steel used in many KA-BAR Knives.

425 High Carbon Stainless Steel
Provides high corrosion resistance, high strength, and ease of sharpening. Corrosion resistance and overall durability make this steel an excellent choice of hard use knives.

440A Stainless Steel
A high-carbon stainless steel used in many American production knives.

American Hone
Sister company to Union Cutlery Company. Specialized in sharpening products. R. Emerson Brown was president of company.

Anodized / Anodizing
Anodizing is an electrolytic passivation process used to increase the thickness of the natural oxide layer on the surface of metal parts.

Blister Pack (BP)
A cardboard backed clear-front packaging option that allows products to be hung on peg board for retail merchandising.

Brown Brothers
The first knife-related company started by Wallace Brown alongside his brother R. Emerson Brown.

Clam Pack (CP)
A clear plastic packaging option that allows products to be hung on peg boards for retail merchandising.

Creamid®
Food and water approved polymer (plastic).

Cryogenic Quenching (CR)
The process of freezing blades to improve blade performance.

D2 Steel
A high-carbon, high-chrome tool steel often used for blanking dies. This steel has excellent edge holding ability. Use diamond or ceramic to sharpen.

Danforth Brown
Former President of Union Cutlery and KA-BAR. Son of Wallace Brown. Guided company through the Great Depression and World War II.

Epoxy Powder Coating
A coating process that protects blades from corrosion and also makes them non-reflective.

Flat Grind
A grind that tapers from the top of the blade down to the cutting edge. Also known as a "V" grind.

Frame Lock
Similar to the side lock or liner lock, except the lock is part of the handle.

Full-Length Tang or Full Tang
Extension of the blade steel that runs completely through the handle to the end of the knife.

Fuller or Blood Groove
A longitudinal groove on the blade of a knife.

G10
An extremely durable material made of woven fiberglass soaked in epoxy resin, then highly compressed and baked.

Glass-Filled Nylon (GFN-PA66)
Material used to make sheaths. Nylon is reinforced with glass particles and other materials to provide strength and durability while still allowing some flexibility.

Grilamid® FWA
Food and water approved polymer (plastic).

Guard
Also known as a hilt, is the material that separates the handle and the blade. Serves to keep the hand from slipping on the blade when cutting. Can be single or double.

Hollow Grind
The ground surface of the blade is concave. Used to create a fine cutting edge.

John Brown
A founder of what is today KA-BAR Knives. Father of Wallace and R. Emerson Brown. Involved in a number of cutlery businesses including Union Razor, Union Cutlery, John Brown Sons, and American Hone.

Kraton G® Thermoplastic Elastomer
Referred to simply as Kraton® or Kraton G®, is a man-made material resembling rubber that can be molded into knife handles. Provides a non-slip grip. Trademark of Kraton Polymers Group of Companies.

Liner Lock
A locking mechanism that features a tab cut out of the liner which is used as a stop to lock the blade in an open position. To close, the liner tab is pushed back to its original position.

Lockback
A folding knife that has a lock release on the back of the handle.

Manufacturer's Suggested Retail Price (MSRP)
The price at which the manufacturer recommends retailers sell their product. Some sellers may sell above, at, or below this price. This is not determined by the manufacturer.

Micarta®
A man-made material, made by layering resin and cloth. Used to make very fine knife handles. Westinghouse trademark.

MOLLE
An acronym for Modular Lightweight Load-carrying Equipment.

Powdered Metal
A process used to make shaped metal pieces. Fine metal particles are molded under pressure and then fused under high heat. Also known as sintered metal.

PVC
Is used mostly in the construction industry and for signs, healthcare applications, and fiber for clothing - we use it for our waterproof playing cards.

Rockwell Hardness (HRC)
An industry scale used for measuring the hardness of blade steel. The higher the reading, the harder the steel. Written as HRC or RC followed by a range of numbers.

S35VN Steel
A high end stainless steel known for its edge retention and toughness.

Swedge
A faux double edge on the blade of a knife. Excellent for reducing the weight of the blade and balancing.

TPR (Thermoplastic Resin)
Thermoplastic Resin is used for making handles. On KA-BAR products like the Kukri #1249, it has a firm but still "giving" feel.

Tidioute Cutlery Company
A former knife company in Tidioute, PA. May have originated as far back as 1874, though we only have records dating to the late 1890s. Formed the foundation of what is today KA-BAR Knives.

Titanium
A high end metal known for its corrosion resistance, strong, lightweight, non-magnetic properties.

Ultradid®
Trade name for hard plastic-like material used to make handles and other products requiring a more rigid stability.

Union Razor
The sales company of Wallace Brown in the 1890s. Would later absorb the Tidioute Cutlery Company to manufacturer knives in the early 1900s.

Union Cutlery
To more accurately reflect their diverse product line the name Union Cutlery Company was adopted. This name replaced Union Razor Company.

Zytel®
A glass-filled nylon material used in making handles for knives. DuPont trademark.

3Cr15 Stainless Steel
An entry-level stainless steel, used today in the knife industry, it has high corrosion resistance and wear resistance.

5Cr15 Stainless Steel
A moderately priced stainless steel that has been used by many knife manufacturers around the world.

9Cr15 Stainless Steel
A chromium ball bearing steel, popular choice in knives.

KA-BAR® Knives, Inc. (the "Company") warrants, to the original purchaser of the product only, that this product will be free from defects in material and craftsmanship under normal use and maintenance for the lifetime of the original purchaser. This Limited Warranty does not apply to any failure of, defect in, or damage to the product caused by neglect, normal wear and tear, or by improper use, including throwing the product, batoning with the product, using the blades as a can opener, chisel, pry bar, screwdriver, digging tool, or for any heavy work for which the product was not designed.

If the product fails to satisfy this Limited Warranty, the Company will repair or replace the product or substitute a product of comparable value, at the Company's option, and such repair, replacement or substitution shall constitute the sole remedy for any failure of the product to satisfy this Limited Warranty or any implied warranty (ies) of the Company. In order to have a Limited Warranty claim evaluated by the Company, you must return the product, at your own expense and risk, to KA-BAR® Knives, Inc., at 200 Homer Street, Olean, NY 14760, attention Customer Service Department. Please include with the returned product a brief written description of any claimed defect(s) in or failure(s) of the product. Any returned product determined by the Company to not be eligible for repair, replacement or substitution under the terms of the Limited Warranty will be returned to the Owner.

The Company makes no express warranty or representation whatsoever of or with respect to the product other than the foregoing limited warranty, and all such other express warranties are hereby expressly excluded. Any implied warranties of the Company, including warranties of merchantability and fitness, are limited in duration to the duration of this limited warranty. The Company will not be liable for any special, incidental, or consequential damages, and all such damages are expressly excluded.

Some states do not allow limitations on how long an implied warranty lasts, or exclusion or limitation of incidental or consequential damages, so the above limitations or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary state to state.

Care for Your KA-BAR®

Wipe blades after use with a dry, soft cloth. If knives are exposed to salt water, wash with mild dish detergent, rinse with tap water, then wipe with a dry, soft cloth.

Storing

Treat blade with a light coating of mineral oil before storing in a dry area separate from its sheath. If possible, store in paper sleeve provided with the knife at purchase.

Sharpening

Keep knives sharp by touching up edges as needed. Most KA-BAR® knives can be sharpened using an Arkansas stone or commonly available sharpening system. Most knives can easily be touched up using a coarse or hard stone.

When bringing back a very dull edge, a coarse or hard stone should be used first, followed by a finer, softer stone.

Knives made with D2 steel require diamond or ceramic sharpeners. Knives should at no time be sharpened on a belt sander or bench grinder. These machines ruin a factory-sharpened edge.

KA-BAR® Blade Shapes

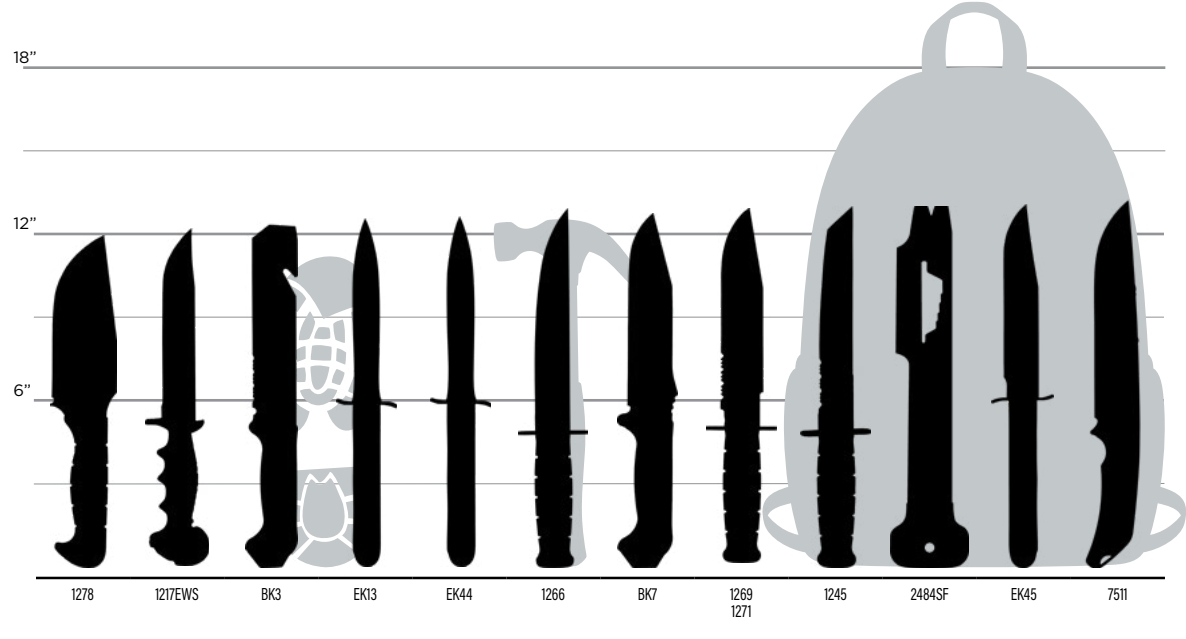

KA-BAR® | SIZE COMPARISON CHART

This size chart is a visual reference and size comparison chart of all our products in relation to some everyday items.

 The average smartphone measures 6" in height.
  The average 16.9 oz water bottle measures 8" in height.
  The average shoe size of an adult male measures 10.5".
  The average household hammer measures 13".

 The average backpack measures 18".
